

	<b>Renewable Portfolio Std.</b>	<b>Clean Portfolio Std.</b>
<b>Percentage requirements</b>	3.75% from 2010-2012 7.5% from 2013-2016 11.25% from 2017-2019 15% from 2020-2030	5% from 2010-2012 10% from 2013-2016 15% from 2017-2019 20% from 2020-2030
<b>Baseload Exclusions</b>	Hydropower (except incremental) Municipal Solid Waste	Hydropower (except incremental) Municipal Solid Waste Nuclear
<b>Eligible Resources</b>	Solar Wind Geothermal Ocean Biomass Landfill gas Incremental Hydropower	Solar Wind Geothermal Ocean Biomass Landfill gas Incremental Hydropower New Hydropower Incremental Nuclear New Nuclear Fuel Cells Inherently low-emission technology Energy Efficiency/Demand Response Any other “clean energy source” certified by the Energy Secretary
<b>Credit Trading</b>	Directs DOE to establish a credit trading program and authorizes the Secretary to delegate the program’s administration to an appropriate market-making entity.	Same
<b>Compliance/Penalty Payments</b>	All money collected by the Secretary from compliance payments and civil penalties are to be held in a renewable energy account by the Secretary and not transferred to the Treasury. Subject to appropriations, the funds are to be used for a state grant program to promote renewable energy.	All money collected by the Secretary from compliance payments and civil penalties will be transferred to the state from which the funds were received to be used to promote clean energy production.

<b>State Flexibility</b>	DOE may waive or mitigate a civil penalty for reasons outside of the utility's control.	Governors may certify their state portfolio standard programs to the Energy Secretary and opt-out of the federal Clean Portfolio Standard. DOE may waive requirements due to force majeure. DOE may also waive or mitigate a civil penalty for reasons outside of the utility's control.
